SCOPE OF WORK:

Koontz Electric Company, Inc. has been awarded the contract for design / build services for the installation of a new electrical distribution system through the Wheeling Machine Facility in Pine Bluff, Arkansas. Wheeling Machines new safety standards required all 13.8-voltage to be outside of all production facilities to allow a safe workplace for their employees. Therefore, a new electrical distribution system from the local utility had to be designed and installed, all while the facility remains operational with minimal interruptions.
