SCOPE OF WORK:

Koontz Electric completed LM Wind Power's manufacturing plant under budget and before deadline. KECI's work force peaked at 70 licensed electricians on site working 60 hours a week and finished the project in 7 months time. KECI installed LM Wind Power's entire electrical system including: 2000A 15kV switchgear, 2 – 4000A unit substations, 2 motor control centers, 7 power distribution panels, 4 power factor capacitors, 800kW generator, and over 130 disconnects. KECI installed over 1,100 lights, over 250,000 ft of cable and over 250,000 ft of conduit. KECI also installed building's dust collection, building management, grounding, lightning protection, fire alarm, heat trace, data, and telephone systems.
