Neil Riddle
Ph. 334-272-7723

Subcontract Amount:

\$1,332,842

Start & Completion Date:

Sept 1999 to Oct 2001

Description of the Project:

The scope of work for this project included the demolition of the old existing electrical and control packages and the installation of a completely new electrical system which included a New Transformer; Electrical Enclosures; Motor Control Center; All conduit, wiring and cable trays.

This project also included the installation of a data acquisition system for the control system of the fluid bed incinerator and central afterburner complex. All process instrumentation was overhauled and re-calibrated. The operating systems were reconfigured and commissioned all by Koontz personnel. The I/O count for this project was in the 500+ range.
